APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

SEVENTH SEMESTER B.TECH DEGREE EXAMINATION(S), MAY 2019

Course Code: EE403

Max. Marks: 100 **Duration: 3 Hours**

Course Name: DISTRIBUTED GENERATION AND SMART GRIDS **PART A** Answer all questions, each carries 5 marks. Marks 1 What is a microgrid? List the characteristics. (5) 2 Explain the merits and demerits of a solar PV plant. (5) 3 Why conventional over current relays may slowly respond or fail to operate in (5) stand-alone Microgrid with significant number of microsources and power electronic interfaces? Justify. 4 A power generating station has a connected load of 80MW and maximum (5) demand of 52MW. The total energy generated annually is 90×10⁶kWh. Calculate the demand factor and load factor. 5 List various components of Advanced Metering Interface (AMI). (5) 6 Describe the challenges and benefits of Home Area Network(HAN). (5) 7 List the advantages of cloud computing. (5) 8 What are the various sources of harmonics in a smart grid? (5) PART B Answer any two full questions, each carries 10 marks. 9 a) Explain with diagram, the working of energy router based interconnecting frame (7) work for the microgrid system. b) What is the function of Energy Management module in a microgrid (3) configuration? 10 a) With help of a neat sketch, explain a typical microgrid configuration. (6) b) Discuss the factors which necessitate the development of smart grid technology. (4) 11 a) Explain the voltage control method in a microgrid with a Q-V diagram. (5) b) Explain the load frequency control in micro grid with a P-f diagram. (5)

PART C

		PART C	
		Answer any two full questions, each carries 10 marks.	. - \
12	a)	Write a short note on the Plug in Hybrid Electric Vehicle Technology describing	(5)
		the architectures.	
	b)	What is a Phasor Measurement Unit(PMU)? How PMUs improve the	(5)
		operational efficiency of smart grid?	
13		Explain in detail, the load shaping objectives and methodologies.	(10)
14	a)	Illustrate the role of technology in demand response.	(6)
	b)	What are the challenges in implementing demand side management in smart	(4)
		grid?	
		PART D	
		Answer any two full questions, each carries 10 marks.	
15	a)	Explain with diagram, about IEC 61850 substation architecture.	(5)
	b)	Write down the transmission protocol of IEC 61850.	(5)
16	a)	Explain the role of NAN in smart grid technology.	(5)
	b)	Draw the cloud architecture of a smart grid.	(5)
17		Briefly explain various harmonic indices.	(10)
		districts.
